---

**Itäkeskus**

Sun 21st of April at 16.00-18.30

# Photography INFO

The underwater photos will be taken by the photography service Molskis, from which website you can also browse photos after the photos are taken (the photos will be ready within a couple of weeks of the photoshoots).

There is no need to sign up for the photoshoots in advance, as all those who wish will be photographed during the swimming session.

If you miss the photoshoot date of your own swimming location, you can use the replacement menu, depending on the situation, to change your swimming date to such a swimming location, where the photoshoots are still on their way.

Pictures can be taken both underwater and above water.

Please note that the link to the ready-made images can easily end up in the spam e-mail as well.

Schedule changes are possible.  
photoshoot schedules can also be found from your profile under the green button "All announcements",  
Information about possible schedule changes ARE also updated there.
